

National Energy

CORPORATION OF TRINIDAD AND TOBAGO

Cleaner energy Smarter solutions For everyone

1. OUR ENERGY OUR IMPACT

- Delivered the Caribbean's first Green Hydrogen Roadmap – currently implementing Horizon 1.
- Installed 100kW Solar PV System at Preysal Service Station – the Caribbean's first solar-powered service station.
- Developed with the Ministry of Energy & Energy Industries, T&T's largest utility-scale solar project.
- Rolled out solar PV systems, EV chargers, and LED lighting in public spaces across Trinidad & Tobago.
- Launched the SUPER ESCO pilot project to help manufacturers save energy and improve efficiency.
- Introduced Trinidad & Tobago's first low-emission tugboat – cleaner environment at our port and sea.

National Energy Resilience: Trinidad & Tobago's first low-emission tugboat

- Tested this country's first methanol fuel blend for local vehicles with Methanex.
- Achieved 67.74% improvement in system integrity and 143.9% in equipment performance through asset integrity upgrades.
- Restored the Sea Lots Channel after 15 years – enabling larger vessels and boosting port revenue.
- Rolled out award-winning education programs in primary and secondary schools.
- Winner of the HRMATT 2024 Best Place to Work award.

2. REGIONAL REACH

We're collaborating with **Guyana and Suriname** to share expertise and strengthen regional energy security – including the **first Government-to-Government Agreement** of its kind.
